

Cross-triangles $K_4 \times$ proton and indistinguishability
PDL Framework — D42

Relation from R_{val}
(valence sector)

Relation from R_{sea}
(relational sea)

Indistinguishability by K_4

The $(A) \wedge (B)$ criterion evaluates cross-triangles.
The coherence distribution is invariant under S_4
for every relation $p_k \in R_{\text{tot}}$.

Config.	Coh.	Result
All +1	64/64	✓ S_4 -inv.
Mixed	64/64	✓ S_4 -inv.
All -1	64/64	✓ S_4 -inv.

Uniform measure = unique measure
consistent with C1-C4
