

The principle of indifference — multi-scale correspondence
PDL Framework — D42

Scale	Entities	Constraint	Optimum (generalised H3)	Eliminated
Signed graph (K ₄)	Signed relations	C1-C4	Uniform measure	Incoherent asymmetry
Atomic nucleus	Nucleons	Nuclear binding	Isospin symmetry	Internal bias
Cellular biology	Proteins	Structural selection	Developmental neutrality	Deleterious mutation
Darwinian evolution	Individuals	Selection pressure	Functional neutrality	Unfounded asymmetry

UNIVERSAL PRINCIPLE

The survival path is the path of minimal cost
